

## Project information

## FACT SHEET 19129

### 19129 Geographic information – Imagery, gridded and coverage data framework

To standardize concepts for the description and representation of imagery, gridded and coverage data in the context of the ISO 19100 suite of standards. This New Work Item Proposal is for a Technical Specification to define the framework for imagery, gridded and coverage data and those elements that require standardization that are not identified in other ISO 19100 standards.

The standard is of particular relevance to the following sectors:

Sector	Of particular interest
Developers of GIS products	
Developers of GIS application systems	
Producers/ suppliers of geographic data	Yes
Users of geographic data and GIS	Yes
Developers of standards	

For further information on this standard and its implementation, please contact ISO/TC 211 secretariat via [www.isotc211.org](http://www.isotc211.org).
