Resolution adopted at the 15th ISO/TC 211 plenary in Gyeongju, Korea, 2002-11-14/15

Resolution 235 Terminology repository future support

ISO/TC 211 considers an on-line terminology repository to be an important component of its information dissemination capability and outreach strategy. ISO/TC 211 expresses its gratitude to ISLinkup for the work it has undertaken in developing and supporting the current prototype database system.

ISO/TC 211 recognizes that the terminology database system requires:

- upgrading to accommodate editing committee changes to ISO 19104 and requirements of the TMG;
- long-term arrangements for hosting and support.

ISO/TC 211 further recognizes that there will be a cost associated with both requirements.

ISO/TC 211 instructs the secretariat to send out a call to NBs and liaisons and invite them to submit sponsorship proposals for the system's revision and/or long-term hosting (5 years). The proposals are to be forwarded to the Secretariat by 2003-03-31.
