| 6.1 Status on NWIP being prepared by Korea. There was very little agreement in the last meeting to the scope of this proposed project. Most WG members felt that the representation of metadata was not appropriate. This item should be discussed once more in WG6 and then submitted for comment through the normal NWIP process. | EunMi Chang                  |
| 6.2 Future work - Encoding<br>Should TC211 address encoding? There exist several well used encoding standards surveyed in TR 19121. How should these be addressed? How should GML encoding of imagery be addressed?   | Convenor and Delegates       |
| 6.3 Future work - Calibration and Validation<br>Several meetings ago Dr. Di was asked to begin the preparatory work on a NWIP for Cal/Val. The intention was to begin the work after 19130 was completed due to resource issues. There is interest in this work min CEOS and ISPRS.   | Li Ping Di                   |
| 6.4 Input to PMG - The PMG will plan the new work for TC211, but needs input from the working groups. WG 6 prepared a Stage 0 Review Summary in project 19124 and report TR 19121. Have the recommendations all been addressed? What remains to be done in imagery under the scope of TC211.  | Convenor and Delegates       |
