Working Group 6 – Imagery

PROPOSED AGENDA

25 May 2010

Meeting of Working Group

1. **Welcome and Introduction** Convenor
2. **Roll call of members** Members
3. **Approval of agenda** Members
4. **Status of current Projects and NWIPs**
Review of the status and time-frame for projects
Completed
 - 4.1 Sensor 19130 - Sent to ISO for publication Li Ping Di
New Projects
 - 4.2 New project: Geographic information - Calibration and Validation of remote sensing imagery sensors 19159 Wolfgang Kresse
 - 4.3 New project: Geographic information - Imagery sensor models for geopositioning, part 2, SAR/InSAR, Lidar, and Sonar 19130-2 Li Ping Di
5. **Harmonized Model Conversion** C.D. OBrien

Review of models in the revised Enterprise Architecture version of the Harmonized Model. The conversion to the new modelling tool has corrupted the layout of the diagrams for existing standards and introduced some side effects such as extraneous {root} indications. The models need to be reviewed against the published standards by the project teams that developed them. How this can be done will be discussed in the meeting.
6. **Discussions as input to future projects** C. D. O'Brien

Discussion on the approach to harmonizing of encoding for Imagery, Gridded and Coverage Data. This has been discussed in several meetings, and the US has previously submitted a NWIP on encoding. The status will be discussed and it will be determined how and if progress can be made.
7. **Working Group 6 report to the TC** Convenor and Project Leaders
Progress
Timetable
Issues
8. **Any other Business** Delegates
